Summary

Bachelor of Computer Applications (BCA) graduate specializing in Cybersecurity, Ethical Hacking, and Cloud Computing (IBM). Strong foundation in SOC operations, threat detection, network security, and vulnerability assessment. Hands-on experience with ethical hacking, network traffic analysis, log monitoring, and security testing through Capture The Flag (CTF) competitions and practical labs. Proficient in tools such as Kali Linux, Wireshark, Nmap, and SIEM platforms. Passionate about applying offensive security knowledge in defensive environments, including security monitoring, incident response, threat hunting, and cyber defense. Seeking an entry-level Cybersecurity Analyst, SOC Analyst, or Information Security role to contribute technical skills and continue professional growth.

Tools & Technologies:

Cybersecurity & SOC: Security Monitoring, Threat Detection, Incident Response, Log Analysis, Vulnerability Assessment, Security Operations Center (SOC), SIEM (Basic)

Tools & Technologies: Kali Linux, Wireshark, Nmap, Burp Suite, Metasploit (Basic), Splunk (Basic), Python

Networking: TCP/IP, DNS, HTTP/HTTPS, Network Traffic Analysis, Firewall Fundamentals

Hands-on Experience: Capture The Flag (CTF) Competitions, Ethical Hacking Labs, Vulnerability Assessment, Network Security Testing

Experience

- **Cybersecurity Trainee**

Pheme Software Pvt. Ltd. (IBM Platinum Business Partner) | Aug 29–30, 2024

- **Secured 2nd Place in a college-level CTF Cybersecurity Competition; solved challenges in web exploitation, reverse engineering, and cryptography.**
- **Participated in 3+ Hackathons focused on Cybersecurity and Software Development**
- **Developed practical skills in network security, threat detection, and incident analysis through hands-on exercises.**
- **Gained hands-on exposure to Multi-Factor Authentication (MFA) and authentication mechanisms.**

Learned Identity and Access Management (IAM) concepts and access control techniques.

Explored security best practices for protecting user accounts and systems.

- **Cyber Security Workshop Volunteer by Offenso Hackers Academy | Aug 2024**

Assisted in organizing and coordinating cybersecurity workshop activities.

Supported participants and contributed to the successful execution of the event.

Projects

- **CRM System (Ongoing)**

Developing a CRM platform for customer and business management. Working on feature implementation, testing, and application improvements.

- **Cloud Forensics Automation for Retail Breaches**

Developed an automated cloud forensics solution for investigating retail security incidents. Focused on log analysis and evidence collection.

- **Hotelo – Hotel Booking Web Application**

Built a responsive hotel booking application with booking management features. Implemented frontend and backend functionality for reservations.

- **MFA Project**

Developed a multi-factor authentication system to enhance account security. Implemented authentication mechanisms to prevent unauthorized access.

- **Password Strength Checker**

Created a tool to evaluate password strength and security compliance. Provided recommendations to improve password security.

Certifications

Google Cybersecurity Professional Certificate – Coursera (Apr 2025)

Ethical Hacker – Cisco Networking Academy (Jun 2025)

Fortinet NSE 1 & NSE 2 (Mar 2026)

MFA Training – Pheme Software (Nov 2024)

Cyber Security Workshop Volunteer – Offenso Hackers Academy (Aug 2024)
